

Low-power
MCUs with
Ethernet and
USB On-The-Go

Kinetis® K6x MCU Family

The Kinetis K series MCU portfolio offers the broadest selection of pin-, peripheral- and software-compatible MCU families based on the ARM® Cortex®-M4 core.

TARGET APPLICATIONS

- ▶ Building control
- ▶ Factory automation
- ▶ Home automation
- ▶ Industrial drivers
- ▶ IoT data concentrators
- ▶ Medical monitoring

These families are performance efficient and offer industry-leading low power while providing significant BOM savings through smart on-chip integration. The Kinetis K series is supported by a comprehensive set of development tools, software and enablement.

The Kinetis K6x MCU family offers IEEE® 1588 Ethernet, full and optional high-speed USB 2.0 On-The-Go (OTG), including options for crystal-less device functionality. Devices range from 256 KB to 2 MB of flash, with 256 KB of SRAM; packages include BGA, LQFP and WLCSP which span from 100 to 256 pins.

The Kinetis K6x MCU family is a scalable portfolio with various levels of integration, offering a rich suite of analog, communication, timing and control peripherals to accommodate a wide range of requirements.

COMPREHENSIVE ENABLEMENT SOLUTIONS

Kinetis software development kit (SDK)

- ▶ Extensive suite of robust peripheral drivers, stacks and middleware
- ▶ Includes software examples demonstrating the usage of the HAL, peripheral drivers, middleware and RTOSes
- ▶ Operating system abstraction (OSA) for our proprietary MQX™ RTOS, FreeRTOS™, and Micrium® µC/OS kernels and BareMetal (no RTOS) applications

Processor Expert® software configuration tool

- ▶ Complimentary software configuration tool providing I/O allocation and pin initialization and configuration of hardware abstraction and peripheral drivers

Integrated Development Environments (IDE)

- ▶ Atollic® TrueSTUDIO®
www.atollic.com/index.php/partnerfreescale
- ▶ Green Hills® Software MULTI
www.ghs.com/products/freescale_kinetis.html
- ▶ IAR Embedded Workbench®
www.iar.com/kinetis
- ▶ ARM Keil® microcontroller development kit www.keil.com/freescale
- ▶ Kinetis Design Studio IDE
 - No-cost integrated development environment (IDE) for Kinetis MCUs
 - Eclipse and GCC-based IDE for C/C++ editing, compiling and debugging

Online enablement with ARM mbed™ development platform

- ▶ Rapid and easy Kinetis MCU prototyping and development
- ▶ Online mbed SDK, developer community
- ▶ Free software libraries

KINETIS K6x MCU FAMILY BLOCK DIAGRAM

Proprietary MQX RTOS

- ▶ Full-feature RTOS kernel, TCP/IP and USB stacks, file system, shell utility, peripheral drivers, board support packages and more at www.nxp.com/mqx

Bootloader

- ▶ Common bootloader for all Kinetis MCUs
- ▶ In-system flash programming over a serial connection: erase, program, verify

- ▶ ROM- or flash-based bootloader with open-source software and host-side programming utilities

Development hardware

- ▶ Tower® System development board platform
 - Rapid prototyping and evaluation
 - Low cost, interchangeable boards
- ▶ Freedom development platforms
 - Low cost (<\$30 USD)
 - Arduino® R3 compatible
 - mbed-enabled on select boards

KINETIS K6x MCU BENEFITS

- IEEE® 1588 Ethernet MAC with hardware time stamping provides for precision clock synchronization for real-time industrial control
- Hardware acceleration block helps to optimize the performance of network controllers providing TCP/IP, UDP and ICMP protocol services
- Up to 180 MHz ARM® Cortex®-M4 core supporting a broad range of processing bandwidth requirements while maintaining excellent cost-effectiveness, easy-to-use packages and a wide range of memory densities
- Featuring digital signal processing capabilities with floating-point unit, offering outstanding computational power for control algorithms, sensor data processing and audio processing, among others, while increasing math accuracy and reducing code size
- Hardware encryption coprocessor for secure data transfer and storage with faster (than software) implementations and minimal CPU loading
- Secure digital host controller supports SD, SDIO, MMC or CE-ATA cards for in-application software upgrades, media files or adding Wi-Fi® support
- Outstanding low-power operation with dynamic currents down to 250 µA/MHz, state retention stop mode down to 5.8 µA with 4.5 µs wake-up time and lowest power mode down to 340 nA
- Smart integration supporting applications requiring higher performance, low power and reduction of BOM cost
- Highly reliable, fast access flash memory with four levels of protection for code security/protection
- Faster time-to-market with comprehensive enablement solutions, including SDK (drivers, libraries, stacks), IDE, bootloader, RTOS, online community and more

KINETIS K6x MCUs: 10/100 ETHERNET MAC WITH FULL-SPEED USB

Kinetis K6x MCU Sub-Family	Kinetis K66 MCUs High Performance	Kinetis K65 MCUs High Performance w/ Security	Kinetis K64 MCUs High SRAM	Kinetis K63 MCUs High SRAM w/ Security	Kinetis K61 MCUs High Mixed-Signal Integration w/ Security		Kinetis K60 MCUs High Mixed-Signal Integration
